IV. Trò chơi:

Stay Alive

Divide the class in two to four teams.

The object of the game is to "stay alive." A student stays alive if the student is able to answer the question asked by the previous student. I will start the question: "Mẹ em tên gì?" Each team member takes turn to ask question and the other team's member will answer the question. After the student answers, that same team gets to ask the opponent team a question. When it is a student's turn, he/she has five seconds to answer **in a complete sentence** (will lose if the answer is not in a complete sentence). If the student is stumped on the answer, he/she is out.

When all, but one, teams lose all their members, the game is over. Each member of the winning team gets \$1 Lac Hong.

Students may help other students on their team, but ONLY from the LIVE students. (Thus, students can pass the answer to each other, but must do it quickly because the student only has 5 seconds to answer, and so on.)
